

Multi-Asset Growth Fund

POWERED BY

INVESTMENT OBJECTIVE

The investment objective is to provide capital appreciation over the medium to long term. Returns will be generated through both capital growth and income, with a bias towards developed and liquid capital markets. The risk will be diversified by holding collective investments in a range of asset classes and geographies. The management of the portfolio aims to meet the objective conservatively by taking managed risk through fund selection and asset allocation. The portfolio is based on the Brewin Dolphin International MPS Passive Plus Growth Strategy.

KEY FACTS

ABOUT BREWIN DOLPHIN

“Established in 1762, Brewin Dolphin has grown to become one of the UK’s leading financial services firms with around 1,500 employees and 30 offices across Britain and Ireland.

Brewin Dolphin are also one of the largest providers of investment management services in the UK, Channel Islands and Republic of Ireland, managing portfolios for both our own clients, charities and those of financial intermediaries.

The investment proposition is driven by an award-winning research team which undertakes research across markets, assets classes and individual companies. Overall, the company has around £42.3bn of assets under management.”

Brewin Dolphin Holdings PLC is listed on the London Stock Exchange and is a member of the FTSE 250 index.

MARKET COMMENTARY

September saw greater volatility in markets which resulted in developed markets ending the quarter broadly flat but still up around 13% since the start of 2021. Emerging Markets were down 8.1% over the quarter as increased regulatory concerns, supply chain disruption and the possible collapse of Evergrande, the second largest Chinese property developer impacted shares. This left the EM markets down -1% for the year. Economically, markets were impacted by continued inflation fears, supply disruptions, increasing energy costs (especially natural gas prices) and expectations peak growth had been achieved.

The S&P500 rose 0.6% over the quarter as initially a positive Q2 earnings reporting season and a dovish tone from the Fed provided a tailwind. However, September was impacted by growth and inflation concerns with the Fed announcing its intention to taper quantitative easing in November. European equities fell -1.7% whilst the UK was broadly flat as dollar strength eroded gains. The UK benefitted from M&A speculation and the rise in energy prices, however, the Bank Of England revealed a more hawkish tone as inflationary impacts remained stubbornly above expectations.

Both Asia and EM were impacted by the issues in China as contagion spread. However, Japan bucked the overall market trend with the Topix rising 4.8%. The index rallied in September following the announcement from Prime Minister Suga his decision to resign.

Within Government Bonds, markets were broadly flat whilst UK Gilts fell on increased concerns over central bank tightening. Global Investment Grade bonds were down 0.8%, whilst high yield provided positive returns.

In September, we no longer had a preference for silver over gold, in large part due to our belief that we've reached the peak in global growth momentum. Therefore, we have decided to switch Silver to Gold.
